Connecting Kids to Mathematics & Science
The Connecting Kids to Mathematics and Science professional development course is designed to provide teachers in grades 4–8 with hands-on experience in integrating mathematics, science, and technology in the classroom. The course guides teachers through developing and implementing problem-based lessons that connect math and science and employ technology to promote student learning. The Connecting Kids course materials include session guides, slide presentations, and handouts. The materials are designed for use by an experienced trainer or facilitator. The nine-session course is designed for classes of up to 25 teachers.

MOSAIC is a K–5 supplemental instructional program that provides engaging and rigorous lessons and resources that integrate math, science, and technology while supporting English learners and academic language skills. Aligned with Texas standards and grounded in research, the inquiry-based activities and real-life scenarios make math and science exciting and relevant for students while building a strong foundation of skills and connections among concepts.
